

**SPECIFICATIONS**

Designed to withstand outdoor elements including rain, wind, and UV exposure without rusting or weakening.

Wind-spilling spring mechanism that allows banners to flex in high winds, reducing strain on poles, brackets, and banners.

Helps extend the lifespan of banners and mounting hardware by preventing tears and breakage.

Adjustable arms accommodate various banner sizes.

Engineered to self-tighten under wind load and return to the original position once winds subside.

**Material**

Made from powder-coated galvanized steel for maximum durability and corrosion resistance.

**Finish**

Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step media blast and iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability.

**Intended Use**

Ideal for street banners, light pole advertising, and seasonal displays in cities, campuses, and commercial areas.

**ORDERING INFORMATION**

Spec/Order Example: BF-BBA/30/8019-S
