

**SPECIFICATIONS**

A GFI with a cover is all about safety. Since the outlet's sitting outside in the weather, you need a tough, weatherproof cover to keep out rain, dust, and dirt. The GFI protects from shock, while the cover protects the GFI from corroding or shorting out.

**Material**

Made from powder-coated galvanized steel for maximum durability and corrosion resistance.

**Finish**

Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step media blast and iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability.

**Intended Use**

Whether it's for maintenance, events, or just a quick job, the GFI outlet turns the pole into a safe, ready-to-go power source right where you need it.

**ORDERING INFORMATION**

**Spec/Order Example: BF-GFI-UI/9005-S**
