

SPECIFICATIONS

Adjustable Knuckle Fitters give you the freedom to aim a light exactly where you need it. Instead of being locked in at one angle, the knuckle lets you tilt and rotate the fixture on the spot. This is appealing to maintenance crews because adjustments are quick in the field without swapping out parts, and once it's locked down, it stays put.

Material

Made from high-strength powder-coated galvanized steel for maximum durability and corrosion resistance.

Finish

Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step media blast and iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability.

Intended Use

whether you're intending to flood a parking lot, highlighting a building, or cut glare from a roadway, this fitter solution adds flexibility to any pole or wall mount while keeping the hardware tough enough to handle the elements.

ORDERING INFORMATION

Spec/Order Example: BF-NKLE23/7004-S

Model	Finish
