

SPECIFICATIONS

This Removable Tenon for round poles is all about making life easier when you've got to change things up. Instead of swapping out the whole pole or wrestling with permanent fittings, the tenon slides out so you can switch fixtures, change mount styles, or do repairs right on site. It saves time, cuts down on labor, and keeps you from needing heavy equipment every time there's an upgrade.

Material

Made from powder-coated galvanized steel for maximum durability and corrosion resistance.

Finish

Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step media blast and iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability.

Intended Use

Towns, campuses, sports fields, or parking lots use them because they're a useful solution that gives you flexibility without sacrifice.
