

SPECIFICATIONS

A top 3-way Fitter Adaptor is a workhorse piece of hardware that lets you mount up to three fixtures on a single pole top. Instead of setting more poles or messing with custom brackets, this adaptor gives you multiple lights in different directions from one sturdy base. Its appeal is its ease of use, it slips over the pole tenon, locks down solid, and is ready to wire without extra hassle.

Material

Made from powder-coated galvanized steel for maximum durability and corrosion resistance.

Finish

Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step media blast and iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability.

Intended Use

You'll see these adaptors in parking lots, sports fields, big yards, or anywhere wide coverage is needed. It's a practical way to get more light out of fewer poles while keeping the setup reliable.

Note: Drill holes for reference only.

[Drilling template must be provided by customer]

ORDERING INFORMATION

Spec/Order Example: BF-T3120/9003-S
